

Professional Development

At the
Jacques Cousteau
National Estuarine Research Reserve (JC NERR)*

Shallow Bays & the Salt Marsh

August 9th & 10th, 2010

8:30 am to 4:00 pm

This exciting two-day workshop will combine classroom and field experiences designed to increase your science content knowledge as we explore the ecosystems of New Jersey's shallow bays and salt marshes. Join the Jacques Cousteau National Estuarine Research Reserve as we get up close and personal with the flora and fauna of these exciting habitats. We'll explore using hands-on activities and current research to discover what is living and happening in and around the Mullica River and Barnegat Bay estuaries.

Workshop Objectives:

- Educators will increase their knowledge and confidence with habitat-based science content
- Participants will enjoy inquiry-based activities in a variety of habitats while practicing a variety of teaching strategies
- Educators will receive high-quality resource materials to facilitate their science teaching.

Registration Fee: \$50 prior to July 22, 2011

(includes: lunch, resource materials and continuing education credits)
