

# Professional Development

At the  
Jacques Cousteau  
National Estuarine Research Reserve (JC NERR)\*

## *De-Mystifying Weather and Climate Science*

**June 30, 2010**

**9:00-5:00**

What's the difference between weather and climate? What factors determine Earth's climate? What is the relationship between weather and a changing climate? How do we know temperature is changing and what are the causes? How is a changing climate affecting wildlife and our wild lands? What activities and resources are there to incorporate weather and climate science into my curriculum? Discover the answers to these questions and more during this one-day workshop for formal and informal educators.

### Workshop Objectives:

- Educators will increase their knowledge of weather and climate science
- Participants will enjoy inquiry-based activities and resources focused on weather and climate science.
- Educators will receive high-quality resource materials to facilitate their science teaching.

*Registration Fee: \$30 Includes: lunch, lesson plans,  
resource materials and CE credits*

### **For Information/Registration:**

#### Contact

Melanie Reding at 609-812-0649 ext.  
206 or register online at
