

**Dr. Donald M. Anderson, *CINAR Director***

December 9, 2020

Dear John:

Congratulations! I'm very pleased to inform you that you've been selected to receive a CINAR Fellowship in Quantitative Fisheries and Ecosystem Science.

A review committee was convened last month to evaluate the applications for this program. The review was led by Jon Hare, Science and Research Director of the Northeast Fisheries Science Center, and applications were evaluated for their responsiveness to the criteria listed in the call. This was an extremely difficult process because of the very high quality of the applicants and their proposals.

The selection committee was very impressed with your application and felt that the research and education activities you've outlined will effectively advance the vision and goals of the NOAA Quest program. Over the next few weeks we will transfer the first year of your fellowship funding. We ask that you provide information about your activities as requested by the CINAR office for use on our website, and for our annual report.

Please let me know if you have any questions about the evaluation process or your own application, and congratulations again!

Sincerely,

A handwritten signature in black ink that reads 'Donald Anderson'. The signature is written in a cursive style and is positioned to the left of a vertical line.

Donald M. Anderson
